ABOUT PROJECT

UPSKILL & RECONNECT! is an international Erasmus+ project that brings together young people from six countries to strengthen digital skills, leadership abilities, and social responsibility.

RESULTS ACHIEVED

- An educational framework and skills matrix for young mentors were developed, clearly defining the competencies needed for working with seniors in the field of digital literacy. This framework serves as a practical guide for organizations and youth workers to prepare young people to take on mentoring roles and to strengthen their sense of social responsibility and intergenerational cooperation.

INTERNATIONAL TRENING

- Youth workers from six partner countries participated in a specialized international training, where they gained methods and tools for preparing young people to become effective mentors for seniors. This process strengthened the capacity of partner organizations to work with youth and to develop programs that address real societal needs.

UPSKILL & RECONNECT!

MENTORING PROGRAM

Around 180 young volunteers were actively involved in the project activities, developing their communication, organizational, and leadership skills through the mentorship program. By working directly with seniors, young people gained valuable practical experience, increased their self-confidence, and strengthened their sense of social responsibility and solidarity.

DIGITAL SKILLS OF SENIORS

More than 180 seniors improved their digital skills and digital literacy, through practical workshops and learning activities led by young mentors. Participants learned how to use basic digital tools, online services, and applications that help them navigate everyday life and become more independent in the digital environment.

HACKATON FOR SENIORS

National hackathons for seniors, a youth exchange event, and the final project conference were organized, where participants presented the project results, shared experiences, and showcased good practices. These events contributed to the dissemination of project outcomes and strengthened cooperation between organizations, young people, and local communities across the partner countries.

PARTNERS IN PROJECT

-  Srbije – MENSA Srbije
-  Slovačke – YYSK
-  Slovenije – Smart Institute
-  Bosne i Hercegovine – EDUKOPRO
-  Maroka – AEFDS
-  Crne Gore – ECOM

LIVING LAB

Intergenerational “Living Lab” activities and workshops were organized, enabling direct collaboration between young people and seniors. These activities fostered knowledge exchange, mutual understanding between generations, and created a positive environment for shared learning and the development of digital competencies.
